- Nepali (Native Language)
- English
- Hindi
- Swedish

Interests

- SwimmingHiking
- DanceKickboxing
- Cycling

Other

- Truckkort A1-A4
- Truckkort B1-B5

Prashanna Rai

Student at Uppsala University and SFI

I am a hard-working, positive, easy going technophile who is continuously keen to learn new things in every single moment possible. I like to spend my free time with my own IT-projects. It would be greatly inspiring to work with people who - despite being the best of their specializations - remain humble and are interested to learn and find solutions together. My ambition is to work as Full Stack Developer. My long-term career objective is to be good with management skills along with the knowledge of requirements engineering, data mining and risk analyst. I would love to be in a place that requires my people skills as well as my technical competence.

WORK EXPERIENCE

Seasonal jobs in restaurant at The White Horse Pub & Restaurang
Feb 2019 - ongoing
